

Inta Timed Flow Shower Control for Prisons with 250mm Spindle

Product no. TF992CP250

Inta timed flow controls are designed for use with our range of thermostatic mixing valves. They provide a full flow service to both shower and hand washing facilities for a fixed period of time before automatically shutting off. This saves water and heating costs in unsupervised areas making it ideal for installation in schools, sports and leisure facilities, hospitals, camping sites, commercial premises and other unsupervised areas. In addition, the valves are easy to operate for users with reduced mobility and are available in exposed and concealed versions.

- Simple operation
- Close automatically
- Economical
- Push Button operation
- Vandal Resistant
- Highly Polished Chrome
- Brass Body
- Concealing Plate (where applicable)
- Standard and contemporary design

Available in standard and contemporary styles (both exposed and concealed) the flow control is safe, reliable and reflects the quality of the Intatec total washroom solutions range.
