

Culligan Filter Cartridge

Type: NCSW

18 litres per minute
Removes sediment to 5 micron
Removes bad taste and odour
Diameter 70mm
Length 252mm

10" water filter cartridges are disposable items that fit inside Culligan NP1 and NDL2 water filter housings. These water filter cartridges are used to filter out undesirable elements from drinking water.

No single water filter cartridge is capable of removing every undesirable element from water. The type of water filter cartridge used is dependant on local conditions. A range of water filter cartridges capable of removing selected elements such as limescale, bad taste, pesticides, particulate matter etc is available.

Function:

The NCSW water filter cartridge will remove, bad taste, odour, Chlorine, organic matter, discoloration and sediment filter.
